

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A beverage making device comprising a frothing member (9) for producing froth in the beverage, ~~characterized in that~~ wherein the device comprises a settling chamber (11) for allowing the frothed beverage coming from the frothing member (9) to settle, and in that the outlet (14) for the settled beverage is at the lower side of the settling chamber (11), wherein a size of the outlet is limited so as to form a restriction.
2. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein the device comprises a brewing chamber (5) for brewing the beverage, means for feeding hot water into said brewing chamber (5), and outflow means for supplying the brewed beverage to the frothing member (9).
3. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein the beverage is injected into the frothing member (9).
4. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein an inlet (12) for supplying the frothed beverage to the settling chamber (11) is located near the expected upper surface of the beverage in the settling chamber (11).
5. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein the frothed beverage is guided along a guiding surface (13) in the settling chamber (11).
6. (Currently Amended) A beverage making device as claimed in claim 5, ~~characterized in that~~ wherein the guiding surface (13) is located in the central portion of the settling chamber (11) and is preferably a substantial horizontally surface.

7. (Currently Amended) A beverage making device as claimed in claim 5, ~~characterized in that~~ wherein the guiding surface is a portion of the surface of the side wall of the settling chamber (11).

8. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein said outlet (14) ~~has an opening of~~ is less than 4 mm^2 , ~~preferably an opening of less than~~ 2 mm^2 .

9. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein said outlet (14) has a substantially circular opening.

10. (Currently Amended) A beverage making device as claimed in claim 1, ~~characterized in that~~ wherein part of the device can be removed from the remainder of the device, said part comprising the frothing member (9), the settling chamber (11), and outflow means (15) for guiding the beverage to outside the device.

11. (Currently Amended) A method of making a beverage by means of a beverage making device comprising a frothing member (9) for producing froth in the beverage, ~~characterized in that~~ wherein the frothed beverage is guided into a settling chamber (11) for settling the frothed beverage, and in that the settled beverage is guided out of the settling chamber (11) through an outlet (14) at the lower side of the settling chamber (11), wherein a size of the outlet is limited so as to form a restriction.

12. (New) A beverage making device as claimed in claim 1, wherein said outlet is less than 2 mm^2 .
